*LEANOhio Boot Camp is for local leaders who work in Ohio cities, townships, counties, school districts, public universities, and other governmental agencies and organizations. The five-day session is entirely practical, with extensive hands-on instruction on Lean methods and tools.*

The training is filled with public-sector examples and exercises. Included is an in-depth simulation involving a prototypical agency, so participants build their toolkits by way of a real-world situation. They will be able to use their new knowledge and skills immediately -- to make government simpler, faster, better, and less costly.

**Scholarships** are available through the Local Government Efficiency Program([www.lean.ohio.gov](http://www.lean.ohio.gov)) to cover the **\$2,000** registration fee.

When LEANOhio Boot Camp participants complete their week of training, they are newly equipped to:

- Scope an improvement project
- Make invisible processes visible so they can be dramatically simplified
- Be an effective improvement team member
- Identify and remove waste
- Eliminate batching and other enemies of speed
- Decrease the complexity of processes and eliminate unneeded steps
- Develop requirements for an efficient process *before* implementing IT solutions
- Create a dashboard of visual data to easily measure progress

**Training Topics Include:**
